Education

Bachelor of Engineering (Mechanical Engineering)

June 2024

Vishwakarma Government Engineering College, India

Technical Skills

- **Programming Languages:** C#, C (Basic)
- **Tools & Technologies:** Tekla Structures (BIM), Engineering Drawing, AutoCAD, Git, Visual Studio.
- **Other Skills:** Version control (Git), Steel Structures, Steel detailing, Shop Drawing.

Professional Experience

Trainee Software Engineer, Stridely Solutions, India

January 2024-Present

- Developed custom plugins and automation tools using the Tekla Structures Drawing API.
- Collaborated with senior engineers to refactor and optimize existing codebases, improving performance and scalability.
- Contributed to the development of scripts and extensions that streamline modeling and drawing processes in Tekla Structures.

Intern, Elever Polytech Pvt LTD, India

April 2024 – March 2024

- I completed an internship at ELEVAR POLYTECH PVT LTD in the project department. During my time there, I gained valuable insights into the project lifecycle and developed an understanding of how various divisions within the company function. This experience provided me with hands-on knowledge of project management and team collaboration, enhancing my overall skills and perspective in the field.

International Automobile Centre of Excellence, India

- Student Training Program, Explored EV and HV vehicle technology at the Automobile Centre of Excellence, with a special focus on the internal components of electric two-wheelers. Engaged in hands-on learning the assembly and disassembly processes of EVs.

Community Experience

National Games Volunteer, National Games 2023, Ahmedabad, India

Sep 2022 – Oct 2023

- Dedicated 15 days as a volunteer at the National Games Gujarat 2022, actively involved in event logistics and operations. Played a key role in ensuring the event's success through teamwork and commitment.
- Performed data entry and other clerical duties to maintain consistent operations

Soft Skills Training, Knowledge Consortium of Gujarat, India

Feb 2023 – March 2023

- Successfully completed a 4-week training program at K.C.G. Finishing School, Government of Gujarat, enhancing life skills, employability, and functional English proficiency. Equipped with valuable tools for personal and professional success.

Academic Projects

Solar Water Heater

- Serving as the Team Leader for the SSIP project, leading the development of a 25-liter mini portable solar water heater. Guiding the team in design and implementation for effective and sustainable heating solutions.

Certificates

Tekla Structures Steel Fundamentals

- Completed an interactive eLearning course on Tekla Structures Steel Fundamentals, covering essential skills for modeling steel structures. Gained proficiency in the Tekla Structures user interface, project setup, basic steel modeling, and system component utilization. Acquired expertise in clash detection, numbering, drawing and report creation, and collaboration using Trimble Connect. Completed a modeling assignment and test to receive a digital certificate.
